Lockset Information

Patient Function

Patients can access from the outside using the anti-ligature pull handle and key cylinder if issued a key. The door will automatically lock shut when closed. Patients can always exit from the inside by turning the anti-ligature thumb turn pull.

Staff Function

Staff can always unlock from the outside using the key even if the thumb turn is held from the inside. The door will automatically lock when closed.

Note: the KG1300 should not be specified on an outward opening door in a patient area as it does not have a secondary means of override - specify KG1400 Auto-Locking Lockset with Secondary Override.

Components

The KG1300 Bedroom Lockset comprises of:

- 1 x KG40 Ergo Grip Pull Handle
