

## PRODUCT DATASHEET

# Visilux Vision Panel 800 x 250mm

The Visilux Privacy Vision Panel combines toughened glass and top quality stainless steel components within a timber frame, delivering a versatile and robust double-sided observation panel that compliments the healing environment. As standard, the Visilux range features 20mm privacy vision bands which are controlled by either the Kingsway Staff Key or an anti-ligature thumb turn.

Picture Panel

### Terms and conditions:

## Operation and Maintenance

### Operation

To allow vision through the panel, turn the control mechanism 90° clockwise to open the vision bands. Turning the control mechanism in the opposite direction will close the vision bands to prevent vision through the panel. If a 'Soft Close' Visilux is specified, the vision bands will automatically return to the closed position when the control mechanism is released.

### Maintenance

Periodic checks should be made to ensure the unit is functioning correctly and is not damaged. Visual checks should also be made to the timber bead to ensure it is fully intact and is holding the panel in place. Fixings should be checked to ensure they remain tight and secure.

### Cleaning

Visilux units should be cleaned with caution using a damp cloth if necessary. Avoid the use of excess water or aggressive cleaning agents. The timber beads should be wiped with a dry or damp cloth only to ensure they do not become water damaged.

## Guarantee

### 5 Year Guarantee\*

\*For faulty manufacture and not for damage

### NBS Specification

Typical description would read: Visilux V8400 Vision Panel with Key and Thumb Turn Control

## VARIATIONS AND DESIGN OPTIONS

# Visilux Vision Panel 800 x 250mm
