

PRODUCT DATASHEET

Visilux Platinum Vision Panel 800 x 250mm

The Visilux Platinum Switchable Vision Panel combines the strength and design features of the original Visilux Privacy Vision Panel with the added benefit of electronic switchable glass. The switchable glass allows the panel to silently change from opaque to clear at the touch of a button, offering the ultimate solution for maintaining safety and patient privacy.

Operation and Maintenance

Operation

To allow vision through the panel, operate the control mechanism to switch the glass from opaque to clear. Depending on specification, the control mechanism will be either a staff key or a push button located on both sides of the panel or one side only. The glass will stay clear until the control mechanism is operated once more, returning the glass to opaque. If a control mechanism is present on both sides, each will be capable of overriding the other.

Maintenance

Periodic checks should be made to the fixings to ensure they are all tight and that they have not been tampered with. The controls should also be checked to ensure they have not been tampered with and that they are functioning correctly.

Cleaning

Cleaning of Visilux panels should be done with caution as they should not come into contact with liquids of any kind. Where cleaning is required, it should be made with a damp (not wet) cloth and a mild detergent if needed.

Fire Ratings

44mm panels are suitable for FD30 doors.
54mm panels are suitable for FD30 doors.

Guarantee

5 Year Guarantee*

*For faulty manufacture and not for damage
