Lockset Information

Patient Function

This lockset requires a key to be unlocked or locked. If issued with a key, patients will be able to lock/unlock the door from both sides. If not issued with a key, patients will only be able to open the door if it is already unlocked.

Note: Check fire code regulation as to where the KG1600 lockset is specified as once locked it can only be opened by a key holder.

Staff Function

Staff will need to use a key to lock or unlock the door. Locking the door will prevent access by unauthorised persons. When safe to do so, the door can be kept unlocked on its rollerbolt to allow access by patients who do not have a key.

Components

The KG1600 Communal Deadlock Lockset comprises of:

- 1 x KG40 Ergo Grip Pull Handle
- 1 x KG129 Roller Bolt Deadlock Lockcase
- 1 x KG175 Euro Escutcheon Pair

Handle Options

The KG40 Ergo Grip Pull Handle can be replaced with the following handles as per project requirement:

- KG30 Easy Grip Pull Handle
- KG60 Classic Grip Pull Handle
- KG80 Recessed Pull Handle.
