

PRODUCT DATASHEET

## KG171-172 Clinic Room Hatch with Vision Panel

The Anti-Ligature Secure Observation Door Hatch is a high secure unit that is installed into doors to provide a secure serving solution with the added benefit of observation abilities. Manufactured to allow items to be passed out of a secure room removing the requirement for the door to be opened for communications or patient serving.

## Installation Description

The KG171-172 Clinic Room Hatch is only supplied as part of a Kingsway Group Complete Door System where all components are fitted and tested in the production process.

## Operation and Maintenance

### Operation

To observe through the vision panel, operate the anti-ligature thumb turn or use the staff key. Unlocking the hatch will allow the hatch to open inwards.

### Maintenance

Care should be taken to ensure that the hatch remains functional and free from signs of damage.

### Cleaning

The unit should be cleaned with caution using a damp cloth. Avoid the use of excess water or aggressive cleaning agents. The timber beads should be wiped with a dry or damp cloth only to ensure they do not become water damaged.

## Guarantee

### 5 Year Guarantee\*

\*For faulty manufacture and not for damage
