

PRODUCT DATASHEET

KG202 SwingHinge

The SwingHinge is a unique double action hinge that allows doors to swing 105° in both directions. This can be used either for double action doors, such as corridor doors, or with a SwingStop anti-barricade device for doors in high risk areas.

Operation and Maintenance

Operation

The SwingHinge allows doors to operate in both directions up to 105°. It is a continuous hinge that secures to the whole length of the door and provides additional finger-safe features.

Maintenance

The SwingHinge has been designed to be largely maintenance free by using self lubricating materials and materials that are resistant to corrosion and wear. Do not use lubricants on the hinge if the action has become stiff as this can affect the performance and usability of the product; contact Customer Services if in doubt. Periodic checks should be made to the fixings to ensure they remain tight and that they have not been tampered with.

Cleaning

Cleaning of the SwingHinge should be made only with a damp cloth. All cleaning agents should be avoided.

Guarantee

5 Year Guarantee*

*For faulty manufacture and not for damage
