STOW Door System

With the ability to be locked back flush to the wall, the anti-ligature STOW Door System provides clinical teams with greater control over service user access to high-risk areas, such as en-suite rooms. The STOW system helps staff manage how the door is used whilst helping service users maintain privacy and dignity. The doorset features anti-ligature recessed hardware and a unique top plate to further minimise risk.

Door can be closed into secondary frame

Door is now safely locked into secondary frame

STOW Key Features & Benefits

Door can be locked back flush to the wall in the open position

Unique top plate minimises ligature risks

Full-length continuous hinge for enhanced strength – no pivots!

High-strength tri-laminate FORTUS core

Compatible with SENTRY & DTM ligature monitor alarms for enhanced safety!

Maximising Staff Control

The STOW doorset offers simple operation whilst maximising staff's control over how a space is used based on clinical assessment:

Free Usage:

If deemed safe, staff can unlock the door allowing service users to open and close it at will.

Stowed:

If a moving door is deemed unsafe but access is still required, staff can securely 'stow' the door leaf flush with the wall for safe passage and observation.

Locked:

If clinical assessment deems it necessary, staff can lock the door shut to minimise risk.
