KG1100 BEDROOM LOCKSET

Outside

Inside

Anti-ligature Disclaimer

Anti-ligature Disclaimer The anti-ligature design characteristics of this product are not intended to replace or substitute the need for necessary supervision of those who may be at risk, or for other necessary protective measures to be taken in the specific circumstances of usage. Kingsway Group, Inc. does not offer any products for sale as being 'ligature-free' and will not be liable for any claims arising from ligature attachment on its products. It is the customer's responsibility to ensure that products purchased and installed are suitable for the environments they are installed in.

The KG1100 Bedroom lockset is the ideal solution to allow flexible access to a patient bedroom or other patient accessible area.

Patient Function

Patient access from outside via anti-ligature pull handle and key cylinder if issued a key or door will be open on the roller bolt. Patient can always exit from the inside by unlocking the deadbolt with an anti-ligature thumb turn pull

Staff Function

Staff can always access from the outside using key even if thumb turn is held from the inside.
Staff can lock door from the outside using key.

Note: KG1100 should not be specified on an outward opening door in a patient area as does not have a secondary means of override - specify KG1200 Bedroom Lockset with Secondary Override.
