KG1400 AUTO-LOCKING LOCKSET WITH SECONDARY OVERRIDE

Outside

Inside

Anti-ligature Disclaimer

Anti-ligature Disclaimer The anti-ligature design characteristics of this product are not intended to replace or substitute the need for necessary supervision of those who may be at risk, or for other necessary protective measures to be taken in the specific circumstances of usage. Kingsway Group, Inc. does not offer any products for sale as being 'ligature-free' and will not be liable for any claims arising from ligature attachment on its products. It is the customer's responsibility to ensure that products purchased and installed are suitable for the environments they are installed in.

The KG1400 Auto-Locking lockset is the product for providing a dual means of secure entry to a patient or staff area.

Patient Function

Patient access from outside via anti-ligature pull handle and key cylinder if issued a key - the door will automatically lock shut when closed.

Patient can always exit from the inside by turning the anti-ligature thumb turn pull

Staff Function

Staff can always access from the outside using key even if thumb turn is held from the inside.

Door will auto-lock when closed.

If the patient has jammed the key-way the lockcase can be opened by using a Kingsway override key (8mm or Oval secure).
