

KG149 SwingThru Double Action Strike Plate

Anti-ligature Disclaimer

Anti-ligature Disclaimer The anti-ligature design characteristics of this product are not intended to replace or substitute the need for necessary supervision of those who may be at risk, or for other necessary protective measures to be taken in the specific circumstances of usage. Kingsway Group, Inc. does not offer any products for sale as being 'ligature-free' and will not be liable for any claims arising from ligature attachment on its products. It is the customer's responsibility to ensure that products purchased and installed are suitable for the environments they are installed in.

This system is a simple and effective means of overcoming barricade situations. It is particularly effective where there is damage to the cylinder as once the SwingStop locks are released the door is free to open even if the bolt has been thrown. This system has been designed to work with the double action SwingHinge but will also work on any double action pivot or hinge.

Installation Description

- Once the door is swinging fit the SwingThru keep in the correct position for the deadbolt or latch of the lockcase.
- Fit the SwingStop ensuring that the frame has been routed sufficiently and that there has been recesses cut for two of the locks.

Operation and Maintenance

Operation

Unlock the SwingStop and open it outwards. This allows the door to swing through the opening.

Maintenance

Regular checks should be made to the locks to ensure correct functionality and security.

Cleaning

Cleaning should be done with a damp cloth. Cleaning agents should be avoided as this could affect the functionality of the lockset.

Guarantee

5 Year Guarantee*

*For faulty manufacture and not for damage
