KG165 Safe Serve Tray Hatch With 3-Point Lock

Anti-ligature Disclaimer

Anti-ligature Disclaimer The anti-ligature design characteristics of this product are not intended to replace or substitute the need for necessary supervision of those who may be at risk, or for other necessary protective measures to be taken in the specific circumstances of usage. Kingsway Group, Inc. does not offer any products for sale as being 'ligature-free' and will not be liable for any claims arising from ligature attachment on its products. It is the customer's responsibility to ensure that products purchased and installed are suitable for the environments they are installed in.

The Safe Serve tray hatch is a high secure unit that is installed into doors to provide a secure tray serving solution. Manufactured to allow items up to 374mm wide to be passed into a room removing the requirement for the door to be opened for communications or patient serving. Secured with security bolts from the fascia on staff side and no visible fixings on patient side.

Installation Description

- Cut out the required aperture in the door to suit the unit
- Fix the inner part of the food hatch and make sure that it is level
- Fix the front fascia and ensure that all fixings are tight

Operation and Maintenance

Operation

To pass an object through the wall, unlock the hatch using a staff key or optional lever handle and swing down into the open position. Pass the object or communicate through the hatch.

Maintenance

Light lubricant can be used on moving parts and periodic checks should be made to fixings and the operating knob.

Cleaning

To thoroughly clean turn the inside catches and remove the whole unit from the wall. Cleaning with a mild detergent and replace when dry. Avoid the use of caustic cleaners.

Guarantee

10 Year Guarantee*

*For faulty manufacture and not for damage
