KG60 Classic Grip Handle

Anti-ligature Disclaimer

Anti-ligature Disclaimer The anti-ligature design characteristics of this product are not intended to replace or substitute the need for necessary supervision of those who may be at risk, or for other necessary protective measures to be taken in the specific circumstances of usage. Kingsway Group, Inc. does not offer any products for sale as being 'ligature-free' and will not be liable for any claims arising from ligature attachment on its products. It is the customer's responsibility to ensure that products purchased and installed are suitable for the environments they are installed in.

The Classic Grip pull handle is a solid handle that has a very large finger grip area making it ideal for the less able. It is shaped to resist ligature attachment and designed for better infection control. The KG60 version is supplied on a large chamfered finger plate with radiused ends.

Installation Description

- Mark out and drill two 10mm deep clearance holes for the bolt heads to go in to
- Place the handle on the door and mark out for the six screws
- Pilot drill the six screw holes
- Fix the handle in place using the six countersunk security screws

Operation and Maintenance

Operation

The Classic Grip has been designed to allow 30mm of grip area for the fingers and the thumb to support on the back face to give a very positive grip making it easier to open heavy doors.

Maintenance

The Classic Grip handle is largely maintenance free. Periodic checks should be made to the fixings that they remain tight and that they have not been tampered with.

Cleaning

Cleaning of the Classic Grip handles should be with a damp cloth. Cleaning agents should be avoided.

Guarantee

5 Year Guarantee*

*For faulty manufacture and not for damage
