

PRODUCT DATASHEET

KG149 SwingThru Double Action Strike Plate

This system provides a simple and effective means of overcoming barricade situations. It is particularly effective where there is damage to the cylinder, as once the SwingStop locks are released, the door is free to open even if the bolt has been thrown. This system has been designed to work with the double action SwingHinge but will also work on any Kingsway double action pivot or hinge.

Installation Description

The KG149 SwingThru Strike Plate is only supplied as part of a Kingsway Group Complete Door System where all components are fitted and tested in the production process.

Operation and Maintenance

Operation

Unlock the SwingStop and open it outwards. This allows the door to swing through the opening.

Maintenance

Regular checks should be made to the locks to ensure correct functionality and security and that there are no signs of tampering.

Cleaning

Cleaning should be done with a damp cloth. Cleaning agents should be avoided as this could affect the functionality of the lockset.

Warranty

1 Year Manufacturer's Defect Warranty*

*For faulty manufacture and not for damage
