

KG205 SwingStop

Anti-ligature Disclaimer

Anti-ligature Disclaimer The anti-ligature design characteristics of this product are not intended to replace or substitute the need for necessary supervision of those who may be at risk, or for other necessary protective measures to be taken in the specific circumstances of usage. Kingsway Group, Inc. does not offer any products for sale as being 'ligature-free' and will not be liable for any claims arising from ligature attachment on its products. It is the customer's responsibility to ensure that products purchased and installed are suitable for the environments they are installed in.

Use the SwingStop removable door stop with a double action continuous hinge to create an effective anti-barricade door system. When locked the door stops against it to limit the door swing to single action – when it is unlocked with the unique Kingsway oval security key it allows the door to swing out to allow the door to open outwards. Wooden stop part available in Ash, Beech or Oak with clear lacquer finish.

Installation Description

- Place the hinge in position on the door frame
- Mark out where the hook bolts will come on the frame and remove material with a cutting tool to suit the frame construction
- Mount the Swing Stop in position using the screws provided taking care not to over tighten.

Operation and Maintenance

Operation

The wood Swing Stop is unlocked by turning the metal key in the top and bottom point by a quarter turn of the Kingsway security key and the flipped outwards using the two recessed finger pulls.

Maintenance

should be made that it is functioning correctly and where necessary light grease can be used in the lock mechanism. Checks should be made that the lock is holding the correctly and fine adjustments can be made to the hook bolt by turning the screw on the lock face.
